About Me

Results-driven Software Engineer with hands-on experience in building web applications, mobile applications and fintech solutions. Skilled in Java, JavaScript, and modern development frameworks. Strong collaborator, passionate about creating high-performance, user-centric digital products. Eager to contribute technical expertise to impactful projects.

Skills

- **Programming Languages:** Java, Python, JavaScript, C++, C, PHP
- **Web Development:** HTML, CSS, Node.js, React.js, Express.js, Bootstrap, Tailwind
- **Database Management:** SQL, MongoDB, MySQL, Firebase
- **Mobile Development:** React Native
- **Development Tools:** Git, Github
- **Testing Tools:** Selenium
- **Soft Skills:** Team Collaboration, Problem Solving, Critical Thinking

Education

BSc (Hons) in IT Specialising in Software Engineering SLIIT

GPA 3.1/ 4.0 | Year 4 Semester 1
Expected Graduation, June 2026

A/L Physical Science

Al Min Haj National School
2019-2021

Projects

Research

June 2025– Present

Webapp Using AI/ML

Proposed idea is to develop an AI/ML-powered learning platform that delivers personalized educational experiences. The platform will utilize machine learning algorithms to recommend courses, adapt learning paths, and monitor learner progress based on individual performance and preferences. The focus will be on creating an intuitive and interactive interface, with intelligent back-end systems that support content adaptation and user analytics. This project aims to improve engagement and learning outcomes by applying AI techniques to tailor educational content to each user's needs

Braille-and-Pen

Mar 2025 – May 2025

Web app |

Braille-and-Pen is an inclusive shopping platform for visually impaired and sighted users, offering product management, user authentication, wishlist features, and real-time data updates.

Technology Stack: **Expo React Native, Node.js, Express.js, Firebase, MongoDB.**

DEV Link – Learning Platform

Mar 2025 – May 2025

Web app |

DEV Link is a comprehensive full-stack learning platform designed to manage user accounts, enable post and comment interactions, and track users' learning progress. It offers a seamless experience for users to engage with content and monitor their growth.

Technology Stack: **React.js, Spring Boot, Firebase, MongoDB, Spring Security.**

AfterEncode - Hosting Platform

Sep 2024 – Dec 2024

web app |

Built a responsive web platform using React.js to showcase hosting plans and services. Focused on user engagement with a clean UI, customer testimonials, and smooth API integration using Axios and Node.js.

Technology Stack: **React.js • Node.js • Axios • Bootstrap • Web Development**

MSR Tailor Store

Jan 2024 – Jun 2024

web app |

Built a comprehensive web application for a tailor shop using the MERN stack to manage rentals, inventory, and employee tasks. Focused on creating a user-friendly interface and system usability.

Technology Stack: **React, Node.js, Express.js, MongoDB**
